

# MILLENNIUM ULTRA WITH 2N® IP VERSO INTERCOM INTEGRATION

## The access control and intercom solution for offices, residential and condominiums

Millennium Ultra integrates with the 2N® IP Verso Intercom system to provide a seamless combination of access control and intercom telephony systems. It provides reliable access control and allows you to easily interface with Millennium Ultra, achieving even higher site security and user convenience with modern intercom system. Millennium Ultra provides possibility for saving and searching intercom events and user friendly Ultra Mobile Connect application to open doors remotely or on the site.

Now you can combine an intercom solution with Millennium's modern access control technology to provide the best-in-class access control solution for your facility.

## Features

- **Calls to mobile phone and tablet** -The 2N® Mobile with provided by Millennium SIP service allows the allows the 2N® IP Verso intercom to call a mobile phone or tablet. Integration with Millennium Ultra provides the ability to open doors remotely by pressing a phone key or via the Millennium Mobile Connect App.
- **Intuitive controls and search** -The touchscreen has all the functions of a mechanical keyboard. You can open the door by keypad access code or by using your card (optional). Discover its luxury design and intuitive controls and search.
- **Modularity** - The modularity of this IP intercom allows you to configure it to your requirements.
- **Remote configuration** - Save time and money for onsite support thanks the remote configuration service. Access all your devices and the Millennium access control software remotely.
- **Touch keypad** - A highly sensitive touch keypad reliably records and evaluates every touch and ensures access to the building is only by authorized persons. All user action (keypad press) is saved in Millennium Ultra Historical Log database and available for an investigation if necessary.
- **Event History** – All intercom events (calls, door opens...) visible in the Millennium Ultra event monitor and saved in Ultra Historical Log sub-system.
