

THE MILLENNIUM VENTUS

A plug and play upgrade for legacy Millennium Expert Access Control Systems

Ventus is a full featured, preconfigured installation of Millennium Ultra specifically designed to upgrade existing Millennium Expert systems up to a maximum of 64 doors.

The total package includes a network ready computer pre-loaded with the most recent version of Millennium Ultra Light complete with all necessary switches and power supplies. It also includes a credit valid for one Expert to Ultra database conversion, and an Enhanced Site Control Unit to interface existing Millennium door control hardware with the customer's local area network.

Designed to simplify the upgrade process in order to create a smooth transition with Millennium ultra in a matter of minutes; rather than a laborious traditional software install on a customer's supplied server.

Part #303-100201

Pre-Engineered Controllers available in 1,2, and 4 reader models complete with power supply and optional battery backup and reader bundles

Compatible

Fully compatible with existing Millennium access control solutions for seamless migration from older Millennium systems to Ultra light. Able to upgrade to Ultra cloud-hosted seamlessly

Convenient

We manage all infrastructure to ensure your system is always up to date, available and fully backed up

Flexible

Upgradeable to full version of Ultra if system expands in the future
