

MILLENNIUM ULTRA INTEGRATIONS WITH VIDEO

All your security views in one place

The Millennium Ultra Access Control platform integrates with multiple video management software systems to provide a combination of superior access control security management and industry acclaimed video management solution. You can now monitor and manage your access control systems and view your surveillance videos all in one location. Same software, enhanced security.

Milestone XProtect video management software (VMS) is powerful and easy to use with a wide array of features for basic to advanced surveillance needs.

Flexible, scalable and easy to use, the March Networks Command VMS platforms will save you time and simplify your video surveillance system management.

Senstar Symphony™ 7's intelligent video management software (VMS) is highly scalable, easy to set up and use. Symphony is a great solution for both single server installations and multi-server deployments.

ACOPA is your Cloud video-surveillance partner to store recorded video in the cloud for easy remote access.
