

MILLENNIUM INTEGRATIONS WITH Wi-Fi HANDLES

Simple, fast, reliable wireless door handle integration solutions

Millennium integrates with a series of third party wireless door handles from industry leading manufacturers like Assa Abloy, Salto and Allegion. The Millennium Ultra software seamlessly integrates with these door handles to provide a versatile and more secure, full-featured access control solution for any size installation. We integrate with all Salto wireless locks compatible with the Salto Pro Access Space software, The Assa Abloy IN 120 Wi-Fi locks and all Allegion AD 300 and AD 400 series.

The Assa Abloy IN120 Wi-Fi lock offers the ease and flexibility of Wi-Fi in a streamlined design with pleasing aesthetics and performance. The IN120 uses 802.11 Wi-Fi infrastructure and a flexible feature set for easier, more cost-effective installations, allowing facilities to expand access control coverage to more doors.

ASSA ABLOY

Totally wire-free and networked through SALTO Virtual Network and SALTO Wireless network, the SALTO wireless locks featuring a variety of models are suitable for a number of use cases from internal doors to fire doors and emergency exits.

SALTO
inspired access

AD Series locks were designed to be adaptable, allowing upgrades to be made to new technologies without taking the lock off the door. They integrate into popular electronic access control systems from Software Alliance members such as with Millennium to deliver a comprehensive EAC solution.
